Patrick McCarthy
Director of Strategic Growth
pmccarthy@rippleeffect.com

Ripple Effect provides professional consulting and exceptional staff augmentation for federal, private, and non-profit clients to deliver some of the most crucial policies and programs that shape our nation. We are researchers and communicators, scientists, analysts and more, driven by curiosity and a commitment to positively impact health, safety and prosperity. We look at the world differently. We build organizational capacity, not dependence, by creating the structure, process and skills needed for long-term success. Bright people, smart processes, and intentional leadership to improve performance and create lasting change. That's the Ripple Way, and our clients deserve nothing less.

Recent Case Studies that Highlight our Capabilities

PROGRAM MANAGEMENT & POLICY

Program Administration and Technical Support Services (PATSS) at Congressionally Directed Medical Research Programs (CDMRP)

Ripple Effect provides staff to support CDMRP's grants and program administration needs across a wide range of task areas. Our staff include Science Officers (grants managers), Program Managers, Public Relations Specialists, Program Evaluators, Data Managers, and Grants Specialists (administrative support). Ripple Effect developed a comprehensive sourcing, vetting, and selection strategy that has been successful in placing high-quality candidates into positions. We consistently receive positive feedback not only on the caliber of our staff, but also on our decision-making tools that we share with the government.

RESEARCH & EVALUATION

Strategic Planning and Evaluation Branch (SPEB) at National Institute of Allergy and Infectious Diseases (NIAID)

Ripple Effect collaborates with a multidisciplinary strategic planning team at NIAID to evaluate processes and outcomes of programs spanning immunology and immunogen discovery, antibacterial resistance, flu research, HIV, and more. For each program, we have conducted data-based portfolio analyses, network analyses, and publication and bibliometric analyses, paired with qualitative interviews and surveys of staff and government, industry, and pharmaceutical stakeholders. We have identified future improvements to the focus, structure, and governance of each program, armed NIAID with actionable insights into improving the efficiency of their programs, and helped NIAID define and measure the impact of key programs on the scientific field.

COMMUNICATIONS & OUTREACH

Health Care Payment Learning & Action Network (LAN)

Ripple Effect provides strategic communications support to the LAN, a public-private partnership to transform health care payment, primarily through print, digital, and interactive resources and campaigns. To date, we have spearheaded a website redesign; managed a membership database; produced bi-weekly e-newsletters; hosted a webinar series; planned and executed three large annual meetings with hundreds of attendees; collected public comments on and drafted several white papers; cultivated social media followers; developed infographics; and conducted media outreach, which has helped the LAN reach thousands of health care stakeholders and advance its mission.

INTERDISCIPLINARY WORK

Office of Disease Prevention & Health Promotion Healthy Aging Initiative Evaluation

The HHS Office of Disease Prevention & Health Promotion (ODPHP) contracted Ripple Effect to conduct focus groups to inform the development of a strategic plan for its Healthy Aging Initiative. In collaboration with ODPHP, Ripple Effect selected focus group participants from multiple federal agencies who were subject matter experts or were significantly involved in aging programs. A Ripple Effect facilitator and a Ripple Effect notetaker conducted the virtual focus groups via Skype using a focus group guide we created. We then qualitatively analyzed the focus groups notes, which we are currently using to create a draft strategic plan. The plan shaped the structure of the first ODPHP Healthy Aging regional meeting. We also provided meeting support, logistics, and facilitation for the meeting series.
