- Scientific Peer Review

Science and Health Policy Consulting Consortium (SHPPCC)

A New Opportunity Brought to You by Ripple Effect

Over the past decade, Ripple Effect has become a preferred partner for our federal clients to access high-quality, credentialed and niche science and health policy experts. Many consultants and small companies lack the past performance, business development expertise, and resources necessary to access and navigate the complexities of government contracting. Ripple Effect has established the **Science and Health Policy Consulting Consortium (SHPPCC)** to address that gap for small organizations—by using our resources to bring together and build a community of independent scientific and health policy consultants. Together, SHPPCC members will share knowledge, skills, and expertise as a unified network to solve the biggest challenges of government agencies.

WHO CAN JOIN?

Members must meet the following criteria to join SHPPCC:

- Past or current federal contractor, employee, or consultant with federal contracting experience
- Sole proprietor or small business with less than five employees
- Based in the general Washington DC Metro (DMV) area
- Subject matter expert in one of our target subject areas

WHAT DOES IT COST?

\$150 annual SHPPCC membership fee.

\$150 one-time, non-refundable application fee.
